Unit Plan

ABSTRACT

This curriculum guide presents a 2- or 3-week unit concerned with the individual child and his relationships with members of the classroom social group. One in a series of resource units, this unit is placed first for several reasons: (1) its content is highly motivational; (2) it provides a meaningful context for acquainting children with each other; (3) it encourages the development of basic sensory skills; (4) it contributes to development of a positive self-concept; and (5) it is designed to review and extend previously developed concepts and skills. The content is ordered from the most simple to the most complex, enabling the teacher to terminate the unit at any point where the content becomes too complex or abstract for the children to grasp. Instructional materials and unit content should be adapted to reflect the physical characteristics of the different children in the classroom. Provided is a listing and explanation of each of the skills to be developed accompanied by suggested instructional activities. Instructional materials are listed with sources; and the appendix provides additional instructional aids. (Author/AJ)

ACKNOWLEDGMENTS

A manual such as this requires the cooperation of many people. We are particularly grateful to the teachers with whom we worked, to the children and to their parents.

Special thanks are owed to Kathy Behm for art work, to Peggy Wilkerson and Marilyn Elkins for editorial assistance and to Martha Lisle and Kaye Spradling for typing.

The work represented in this manual was funded by Office of Economic Opportunity Grant CG 9995 and Office of Education Contract No. NPECE-70-006. Contractors undertaking such projects under government sponsorship are encouraged to express freely their professional judgment of the conduct of the product. Points of view or opinions stated do not, therefore, represent the official policy of either office.

I. Introduction

The unit All About Me is concerned with the individual child and his relationships with members of the classroom social group—the teachers and other children. All About Me is placed first in the series of resource units for several important reasons:

- 1. Since most children are interested in and concerned about themselves, the content should be highly motivational to the group.
- 2. This unit, which could very appropriately be called <u>Getting to Know You and Me</u>, provides a meaningful context for acquainting the children with each other—a very important initial step in the beginning of a program or a new school year.
- 3. Young children learn most effectively when engaged in concrete interactions with the environment. This unit, which deals with the aspect of the child's environment most immediate to him--him-self and his body, provides many opportunities to encourage the development of basic Sensory Skills which lay the intellectual groundwork for subsequent Concept Development.
- 4. The major content objectives for the child are to develop awareness and understanding of self--the child's name, body parts, function of the body parts, clothing, interests, and abilities. Hopefully these experiences will contribute to the child's development of a positive self-concept, the solid foundation necessary for subsequent learning and development.
- 5. Every child has been experiencing himself since birth. All About Me, therefore, is focusing on experiences familiar to all the children in the group. This unit is designed to begin "where the child is" and to review and extend the understandings, concepts, and skills which he has developed previously.

This unit, as all units in the series, must be adapted to your particular group of children. Although it is suggested that two or three weeks be devoted to All About Me, you will need to adjust the length according to the interest, attention span, and skill level of your children. Because the understandings are ordered from the most simple to the most complex, you can terminate the unit at any point where the content becomes too complex or abstract for the children to grasp. Instructional materials, as well as the content of the unit, should be adapted for your particular children. All commercial or teacher-made materials concerning the self and the body should reflect the physical characteristics of the different children in your classroom.

II. Concepts and Understandings

- A. Everyone has a name.
 - 1. Each of us has a first name.
 - 2. Names are used for identifying ourselves and each other.
 - 3. Some of us have the same first or last name as someone else.
 - 4. Most of us have a middle name.
- B. The part of us that we see is called the body.
 - 1. Each part of the body has a name.

skin chest
hair waist
head abdomen
neck hips
shoulders legs - knees - ankles
arms - elbows - wrists feet (foot) - toes - toenails
hands - fingers - fingernails

2. The head has very special parts, each with a name.

face mouth - lips - teeth (tooth)
forehead ears
eyes - eyebrows - eyelashes cheeks
nose chin

- C. Each part of the body has a special use.
 - 1. We use our legs and feet to move from one place to another and to walk, jump, run, hop, skip, dance, and kick.
 - 2. We use our arms to move and carry objects.
 - We use our hands and fingers to touch, grasp, and carry objects, to clap to music, and to make signals and gestures.
 - 4. We use our eyes to see.
 - 5. We use our ears to hear sounds.
 - 6. We use our nose to help us breathe and to smell odors.
 - 7. We use our mouth to eat, talk, sing, whistle, and breathe.
 - 8. We use our teeth to chew food and to help us speak clearly.
 - 9. Our skin protects our body from rough objects.

- 10. Our hair helps to keep us warm in cold weather.
- D. We wear clothes on our bodies.
 - 1. Each piece of clothing has a name.

trousers skirt hat blouse coat socks underpants stockings - hose shoes shirt dress pajamas tie slip gown jacket shorts pants

2. Some clothes are worn by males.

trousers shirt tie

3. Some clothes are worn by females.

dress skirt slip gown blouse stockings or hose

4. Some clothes are worn by both males and females.

hat pants coat jacket shoes pajamas socks

- 5. Clothes help protect our bodies.
 - a. We wear clothes to keep our bodies from being cut or scratched.
 - b. We wear clothes to keep the hot sun from burning our skin in summer.
 - c. We wear clothes to keep our bodies warm when the weather is cold in winter.
- E. We are all alike in many ways.
 - 1. We have the same basic body parts.
 - 2. We have the same basic needs.
 - a. We need food, water, and air.
 - b. We need exercise to be healthy.

- c. We need sleep and rest to be healthy.
- d. We need to keep our bodies clean in order to stay healthy.
- F. We are different in many ways.
 - 1. We are different sizes.
 - a. Some of us are short; some of us are tall.
 - b. Some of us are fat; some of us are thin:
 - c. Some of us are big; some of us are little.
 - 2. We have different colors of skin.
 - a. Some of us have very dark skin.
 - b. Some of us have very light skin.
 - c. Some of us have freckles on our skin.
 - 3. We have different colors, textures, and lengths of hair.
 - a. Some of us have very dark brown, red, or black hair.
 - b. Some of us have very light red or blond hair.
 - 4. We have different colors of eyes.
 - a. Some of us have blue eyes.
 - b. Some of us have brown eyes.
 - c. Some of us have green or gray eyes.
 - 5. We are different sexes.
 - a. Some of us are male (boys, men).
 - b. Some of us are female (girls, women).
 - 6. We are different ages.
 - a. Some of us are very young infants.
 - b. Some of us are children.
 - c. Some of us are adults.
 - d. Some of us are very old people.

- 7. Our voices are different.
 - a. Our voices are different in volume and pitch.
 - b. Each person has his own distinctive voice which can be used to identify him.
- 8. We have different abilities.
 - a. Each person has a certain amount of skill to do different tasks at home and at school.
 - b. There are some things we can do better than others and some tasks which others do better than we do.
- 9. We have different interests or likes and dislikes.
 - a. Each person has a certain amount of interest in different activities at home and at school.
 - b. There are some activities we like that others do not enjoy and some activities others enjoy that we do not like.
- 10. There are different ways that each of us feels at certain times.
 - a. Sometimes we feel happy which we show by smiling, laughing, clapping our hands, jumping up and down, dancing or singing.
 - b. Sometimes we feel sad which we show by frowning, crying, or by being very quiet.
 - c. Sometimes we feel angry or mad which we show by frowning or by being very quiet.
 - d. Sometimes we feel like being alone.
- G. Although we have many differences, we can work together as a group.
 - 1. We need standards for sharing food, toys, materials.
 - 2. We need standards for taking turns.
 - 3. We need standards for caring for our classroom materials.
- H. Our bodies grow and change.
 - 1. When we are very young, we are called babies or infants.
 - a. We are very small and light in weight.
 - b. We are not able to move about by ourselves.
 - c. We have very little body hair and no teeth.

- d. We cannot tell others how we feel or what we want because we cannot talk.
- 2. As we grow older, we are called children.
 - a. We get taller and heavier in weight.
 - b. We begin moving around by learning to walk.
 - c. We begin to take care of ourselves by using our arms and hands to feel ourselves, to hold and carry objects, and to dress ourselves.
 - d. We grow more body hair and have teeth.
 - e. We learn to talk so we can tell others how we feel and what we want.
- 3. When we are full grown, we are called adults.
 - a. We stop getting taller.
 - b. We have strong bones and muscles to help us move and lift heavy objets.
 - c. Men have body hair on their faces.
 - d. Women give birth to live young.
 - e. We can take care of ourselves without help.
- 4. When we become very old, we are called elderly.
 - a. Our muscles and bones are no longer as strong.
 - b. Sometimes we lose our teeth.
 - c. Sometimes our hair becomes gray or white.
 - d. Sometimes we cannot see or hear very well.
 - e. Our skin becomes wrinkled.
 - f. Sometimes we need help in taking care of ourselves.
- I. We are all living things.
 - 1. Living things grow, reproduce, and need food, water, and air in order to live and grow.
 - 2. Things which are not alive are called non-living things.
 - 3. Clothes, furniture, and toys are some non-living things because they do not grow and reproduce.

III. SEQUENCED INSTRUCTIONAL GUIDE

III. Sequenced Instructional Guide

UNIT UNDERSTANDING: A. Everybody has a name.

- 1. Each of us has a first name.
- 2. Names are used for identifying ourselves and each other.
- Some of us have the same first or last name as someone else.
- 4. Most of us have a middle name.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Auditory Skills

Listens to discussion and song
Separates and combines melody,
rhythm, and words of song
Isolates proper names from other
song words

ABSTRACTING SKILLS

Conceptual Skills

Knows concept of self
Knows words, melody, and rhythm
of song
Recognizes proper names of self,
teacher, other children

Association Skills

Relates self with a proper name Relates teacher and other children with their proper names

RESPONSE SKILLS

Verbal Skills

Identifies self by proper name Reproduces melody, rhythm, and words of song Answers when proper name is spoken or sung

1. Basic Activity

Talk to the children about your own name and the names of any other teachers or adults in the classroom. Emphasize the fact that everyone has a special name. Move around the group and ask each child "Who are you?" Encourage each one to give his first name. If any child does not give his name, you say, "This is If any children share the same first name, draw this fact to the attention of the group. Indicate that there is a problem: Whenever you use the name, both (or more) children will respond. With the children, decide what you will call these children (using a middle name or last name) in order to identify each one.

Teach the children the song "Where is Mary?" Sing the whole verse, indicating the lines that a child should sing. Select a child most likely to participate as a role model, and demonstrate the song for the group. Then move around the group, singing to each individual child as all the children help sing the teacher's lines.

Evaluation

Note how many children (1) respond to their names, (2) answer when their names are called, (3) sing the correct melody and words to the song

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

1. (cont.)

Extension Activities

This song can be sung often during the unit. As soon as the children are responding eagerly, ask individual children to assume the role of the teacher. This will help them learn to identify all the other children in the group.

Throughout the unit, emphasize each child's name in every possible way. Some suggested techniques are:

- a. Whenever you speak to a child, ask him a question, give him directions, or respond to his comments, use his first name.
- b. Encourage the children to refer to each other by name.
- c. Make each child a name tag to wear around his neck for several days. This will help you to identify the child and will help the child understand that his name is important.
- d. Make a name tag for each child's chair and coat hook. This practice should be continued throughout the year to encourage the child to learn to recognize and later identify his printed name.
- e. Print each child's name on all his art and paper work. This should be done as the child watches or helps you hold the crayon. By continuing to do this all year, you will help the child recognize the letters in his name and their order, and he will probably attempt to reproduce his name by the end of the year.

c, d, e. Discriminates, recognizes, and identifies printed name for self Relates printed name with spoken name for self

UNIT UNDERSTANDING: A. Everybody has a name.

- 1. Each of us has a first name.
- Names are used for identifying ourselves and each other.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on teacher and book
Isolates objects in the pictures

Auditory Skills

Listens to the story being told Listens to labels for pictures Listens to questions

ABSTRACTING SKILLS

Conceptual Skills

Knows objects in the pictures Knows concept of a name Understands simple questions

Association Skills

Relates pictures with the events in the story Relates objects in the pictures with their labels

RESPONSE SKILLS

Verbal Skills

Answers simple questions about story
Labels objects in pictures
Describes drawing

Motor Skills

Manipulates crayons and paper

2. Basic Activity

Read the book Maria, Everybody Has A Name to the children.

This may be the first time a book is used with these children. Describe the book: It has a front cover and a back cover "just as you have skin to protect you." Call attention to the title or name of the book. Also note the picture of a little girl about the same age and size as the children in the room. This book should be picture-read; therefore, the teacher must be very familiar with the story. When picture-reading to children, hold the book so all children can see the pictures.

Tell the story in sequence using the pictures in the book to illustrate each part of the story you tell. The amount of the story you will include will depend upon the attention span of the children. If they seem restless, quickly finish the story. Just before the end of the story ask, "Do you think Maria will ever say her name?" When you have finished the story, emphasize the fact that Maria, like each of them, does have a name.

Assessment Activity

Let the children use crayons and paper and draw one thing or one person from the story. As they draw encourage them to tell you about their picture and other parts of the story.

- 1. Each part of the body has a name.
- 2. The head has very special parts, each with a name.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on child's body Isolates the major parts of the body

Auditory Skills

Listens to labels for body and parts

ABSTRACTING SKILLS

Conceptual Skills

Knows concept of body Knows major body parts

Association Skills

Relates each body part with its label

RESPONSE SKILLS

<u>Verbal</u> <u>Skills</u>

Labels the major body parts
Repeats complete sentence
responses modeled by
teacher

Motor Skills

Locates a body part when named

1. Basic Activity

Using yourself and a child, show the children what is meant by the label "body." Then focus on the basic parts -- head, shoulders, arms, hands, chest, hips, legs, feet. Point to the head of the demonstration child, making sure to indicate the whole head. Ask the children if anyone can name this part of the body. If no one gives the label "head," supply the label. Ask the children to repeat the word. Encourage the children to say, "That is a head," or "That is 's head." Ask the child to find the same part on your body. Continue this procedure, moving from head to feet. When all the basic parts have been covered, repeat the procedure for any of the parts which were

Assessment Activity

Play a recognition game. Ask individual children to come to the front of the room and find a certain part of ______'s body. If any have difficulty, ask other children to assist. When a child locates a part, encourage the child to name it.

unfamiliar to most of the children.

a. Distinguishes, knows, and labels small body parts

Extension Activities

a. When the children are familiar with the most basic body parts, introduce the labels for the smaller, more obscure parts -- neck, elbows, wrists, fingers, fingernails, waist, abdomen, knees, ankles, toes, toenails, hair, skin.

Counts body parts one-by-one --

one to five, one to ten

BASIC SKILLS TO BE DEVELOPED

1. (cont.)

INSTRUCTIONAL ACTIVITIES

b. Use the parts of the body throughout the unit to develop number concepts and relationships. For
example, use the head, neck, chest,
and abdomen as examples of sets of
one. Use the arms, shoulders,
hands, wrists, elbows, hips, legs,
knees, ankles, and feet as examples
of sets of two. Fingers and toes
can be used for one-by-one counting
from one to five and eventually to
ten.

1. Each part of the body has a name.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on reflection of self in mirror
Focuses attention on photograph
Isolates body parts
Discriminates one photographic image of a child from another

Auditory Skills

Listens to directions
Listens to labels for body parts
and to the descriptions of the
relationships of body parts

ABSTRACTING SKILLS

Conceptual Skills

Knows body parts
Knows mirror and its use
Recognizes position concepts -top, bottom; above, below;
over, under; between; at the
side; beside; front, back
Recognizes number concepts -one, two

Association Skills

Relates self with mirror image and photograph of self Relates other children with their photographs Relates each body part and each concept with its label

RESPONSE SKILLS

Verbal Skills

Identifies number concepts -one, two
Identifies photographs of self
and other children

Motor Skills

Reproduces a recognizable model of the body

2. Basic Activity

Plan an activity for a small group of children which requires a minimal amount of teacher direction, leaving you free to work with an individual child. Taking one child at a time, give him the opportunity to study his reflection in a full-length mirror. As you name different parts of the body, ask him to point to his own as he looks in the mirror. Then stand behind the child and describe the relationship of his body parts as he watches his reflection. Move your hands from his head to his feet as you emphasize the position of each part.

Examples: Your head is on the top of your body; your neck is under your head, between your head and your shoulders.

Then ask him "how many" of each part he has.

If possible, take a photograph of each child. Display the pictures, with the children's names, in the room where the children can study them and learn to identify the images of each other.

Assessment Activities

During the unit, give the children many opportunities to reproduce models of body figures using a variety of art and construction materials -- clay, play dough, crayons and paper, paint, Rig-a-Jig, Tinkertoys, etc. Note whether the models of the body become more realistic as the children learn more about body parts and their relations to each other.

Each part of the body has a name.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on model of self Focuses attention on mirror image of self Distinguishes body parts in drawing Discriminates likenesses in the colors of crayons and the

colors of clothing and skin

Auditory Skills Listens to directions

ABSTRACTING SKILLS

Conceptual Skills Knows body parts

Association Skills

Relates self with model of self Relates each body part with its label

RESPONSE SKILLS

Verbal Skill**s** Labels body parts

Motor Skills

Selects crayons to match the colors of clothing and skin Manipulates crayons within thick Manipulates scissors appropriately

3. Basic Activity

Make a life-size model of each child. Taking one child at a time, have the child lie on his back on a large piece of white or tan butcher paper. Using a black magic marker or thick crayon, draw around his body to make his out-(Place his arms and legs so that you can draw under the arms and between his fingers and legs.) Ask the child to label the parts of his body which are shown in the drawing. As the child looks at his reflection in the fulllength mirror, ask him to select crayons from a box which match the colors of his clothes and his skin. If he has difficulty, assist him in finding the matching colors. Encourage the child to color his model to make it look just like he looks. When the child has finished coloring the model, give him scissors to cut out the form. Show him how to cut on the wide line.

Evaluation

Assess each child's abilities to do the following: (1) match colors of clothing and crayons, (2) color within the thick line, (3) color body parts to approximate his actual appearance,

- (4) cut out the model along the line,
- (5) label body parts.

When all the models are finished, hang them on the walls around the room. Put a name label under each one.

UNDERSTANDING: B. The part of us that we see is called the body.		
BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES	
	3. (cont.)	
	Extension Activities The models can be used later in the unit in the following ways:	
a. Discriminates, recognizes, and identifies the models of other children	a. Point out distinctive features each and encourage the children identify the models of each other	
 b. Discriminates, recognizes, and identifies size concepts tall, short, fat, thin 	b. Use the models for size compart (tall, short, fat, thin).	
c. Discriminates likenesses and differences among colors	c. Use the models for color match Point to a color and one model ask a child to find another mowhich has the same color on it	
. •		

1. Each part of the body has a name.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on teacher as she models appropriate actions for the song or singing game Discriminates circle formation

Auditory Skills

Listens to the melody, rhythm, and words of the song or singing game Separates and combines melody, rhythm, and words

ABSTRACTING SKILLS

Conceptual Skills

Knows concept of self
Knows concept of body
Knows body parts
Knows words, melody, rhythm,
 and actions of song
Recognizes shape concept -- circle

Association Skills

Relates the action with appropriate line in the song Relates the action with the appropriate body part

RESPONSE SKILLS

Verbal Skills

Reproduces song correctly Identifies circle formation

Motor Skills

Reproduces actions of song appropriately
Reproduces circle formation by holding hands in a group

4. Basic Activity

Teach the children a simple action song or singing game involving the parts of the body. ("Head, Shoulders, Knees, and Toes," "Where's Mister Thumbkin?," songs on Concept Records, Volumes 1 and 3). Select a song which has a relatively simple melody and involves repetition of words. When introducing a new action song or singing game, teach the words and the tune taking one line or verse at a time. After the song has been learned, introduce the appropriate actions or the directions for the game which correspond with the song lines. If you use a circle formation for the game, introduce the concept of a circle and show the children how to "make a circle" by holding hands.

Evaluation

As the children learn the action song or singing game, note how well each child is able (1) to reproduce the melody, (2) to reproduce the words, (3) to touch or use the appropriate body part as it is designated in the song.

BASIC SKILLS TO BE DEVELOPED

-

1. Each part of the body has a name.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on representations of body parts
Discriminates among body parts
Discriminates likenesses and
differences in sizes of body
parts
Separates and combines body parts
to make a whole

Auditory Skills

Listens to discussion of body
parts
Listens to questions concerning
positions of body parts
Listens to directions concerning
assembly of body parts

ABSTRACTING SKILLS

Conceptual Skills

Knows parts of the body
Recognizes size concepts -- long,
 short
Recognizes position concepts - top, bottom; above, below;
 over, under; between; at the
 side; beside; front, back
Understands "What comes next?"

Association Skills

Relates representations of body parts with own body Relates each body part and each concept with its label

5. Basic Activity

Play a flannelboard game to focus on the positional relationships of the body parts. Make a large felt body, and cut it into parts which can be assembled like a puzzle, or use a commercial flannel set (Instructo, My Face and Body). Introduce the activity by creating an atmosphere of enthusiasm and suspense. Hold up a few pieces of the felt figure and explain that you can make something with these pieces of felt and you wonder if anyone can guess what they could make. Encourage the children to identify the different parts as you show each one. Hold up an arm and a leg to see if they can discriminate between the two. Talk about the concepts "long" and "short" and have the children compare their own arms and legs.

As a group, construct the felt figure on the flannelboard, beginning with the head. Ask "What comes next?" as you move down the body. Encourage the children to verbalize where they are placing each part, using the labels for the concepts top, above, below, under, beside, at the sides, next to.

Assessment Activity

Following the flannelboard activity, give each child a piece of construction paper and an envelope of pre-cut parts to assemble a whole body.

This activity can be varied according to the skill level of the children in the following ways:

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

RESPONSE SKILLS

<u>Verbal</u> Skills

Labels representations of body
parts
Identifies "What comes next?"
Identifies size concepts
Describes positions of body parts

Motor Skills

Arranges body parts to make a whole figure
Pastes body parts appropriately

5. (cont.)

- a. Less skilled or immature children may be more successful if the body pieces are very realistic in appearance, similar to the felt pieces used in the previous activity. In addition, they may require some visual aid in assembling the pieces -- a full-length mirror where they can check their own reflection or a sample of the completed construction figure which is displayed as a model for them to follow.
- b. More skilled children can probably assemble the pieces without looking at a whole figure (using a mental image of a complete body).

When a child has assembled the body parts, give him paste to complete his construction. For each child, provide a jar of paste or a piece of paper towel with a lump of paste on it. Later in the year it will be appropriate to expect children to share paste jars. Encourage each child to use one finger, "pointer finger," for pasting. Place names on the finished work and display them on the classroom wall.

Discriminates, recognizes, and identifies shape concepts -- circle, square, rectangle
Discriminates, recognizes, and identifies color concepts -- red, yellow, blue
Discriminates, recognizes, and identifies number concepts -- one, two

Extension Activity

Many children could use basic shapes to construct a more abstract figure.

Examples: Use a circle for a head, a square for the body, and two lengths of thin rectangles for arms and legs.

The parts could be of colored construction paper of one or more primary colors (red, yellow, blue), shapes (circle, square, rectangle), sizes (long, short), and number sets (one and two).

The head has very special parts, each with a name.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

<u>Visual</u> <u>Skills</u>

Focuses attention on reflection of self in mirror
Focuses attention on puzzle
Distinguishes facial parts in mirror reflection and in puzzle
Separates and combines puzzle parts

Auditory Skills

Listens to labels for facial parts
Listens to questions concerning
positions of facial parts
Listens to directions for game and
puzzle assembly

ABSTRACTING SKILLS

Conceptual Skills

Knows concept of self
Knows major body parts
Knows facial parts
Knows mirror and its use
Recognizes shape concept -- round
Recognizes position concepts -top, bottom; above, below;
over; under; between; at the
side; beside; front, back
Recognize number concepts -- one
two

Association Skills

Relates self with mirror image of self
Relates each facial part and each concept with its label

RESPONSE SKILLS

Verbal Skills

Labels facial parts
Identifies positions of facial
parts in relation to each other
Identifies number concepts

6. Basic Activity

Give each child a small hand mirror to observe his reflection as you discuss the head (round) and its parts. Ask the children to identify the basic parts -- face, hair, ears, eyes, nose, mouth -- as you point to your own. Supply any labels they do not give. Then move to other parts -- forehead, eyebrows, eyelashes, cheeks, lips, teeth, chin -- using the same procedure of finding and identifying each part as you used with the body parts. Ask the children questions involving recognition of position concepts.

Example: What is above your nose?
What is beside your nose? What is
under (below) your nose?
Then ask individual children to
describe where a certain part is located in relation to the other parts.
Assist children in verbalizing the
orientation when necessary. Collect
the mirrors and play a quick, fun
action game. Give the children fast
directions for finding a body part.

Examples: close your eyes, point to your nose, wiggle your ears, open your mouth, close your mouth.

Assessment Activity

Make face puzzles by mounting large magazine pictures of faces on heavy tagboard and cutting them into pieces. Make some of the puzzles quite simple by making few cuts and keeping basic parts intact. Make others more difficult by increasing the number of cuts made. Give each child a puzzle appropriate to his ability level. As each completes his puzzle, ask him to identify the parts of the head and tell you how many of each part there are. Encourage him to work another puzzle which is a little more difficult.

2. The head has very special parts, each with a name.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on felt face and removable parts
Focuses attention on potato and facial parts
Detects missing parts of flannel face
Separates and combines facial parts

Auditory Skills

Listens to questions Listens to directions

ABSTRACTING SKILLS

Conceptual Skills

Knows face and facial parts
Knows concept of a name
Recognizes position concepts
Recognizes number concepts
one, two

Association Skills

Relates flannel face with own face
Relates potato head with real head
Relates each object and each
concept with its label

RESPONSE SKILLS

Verbal Skills

Labels facial parts
Identifies position and number
concepts
Identifies missing parts
Suggests names for flannel face
and potato head

7. Basic Activity

Play a "What's Missing?" game on the flannelboard. Make the Felt Face with removable parts (DARCEE). Ask individual children to identify a part as you hold it up, and place it on the felt face in the proper position. When the face is assembled, perhaps the children would like to suggest a name for the face.

Then introduce the game. Explain that when you tell them to close their eyes, you will remove a part of _____'s face. You will tell them when to look. The first person to raise his hand and correctly tell what is missing (or what ____ has lost) can put the part back on the face. When the children understand the game, ask different ones to assume the role of the teacher.

Assessment Activity

Make potato heads, using no model or mirror, to see how well the children can place the parts of the head. Give each child a potato for the head. In a sectioned box, place the facial parts which can be plastic pieces from a commercial potato head kit or teachermade construction paper pieces. Ask each child to select the parts he will need, identify each part, and tell you how many of each he needs. As each child completes his head, encourage him to name it. Assess how well he was able to select, identify, count, and arrange the parts.

The part of us that we see is called the body. UNIT UNDERSTANDING: B. BASIC SKILLS TO BE DEVELOPED INSTRUCTIONAL ACTIVITIES Motor Skills 7. (cont.) Places missing facial part in correct position on flannel Selects parts needed to complete potato head Assembles small facial parts to make a head Extension Activity Plan a paste and construction paper activity using a face and its parts. This activity can be planned in a variety of ways to develop basic skills and concepts with children at different levels of ability.

- a. Recognizes and identifies position concepts Recognizes and identifies number concepts -- one, two
- b. Recognizes and identifies color concepts -- red, yellow, or blue

 Recognizes and identifies shape concept -- circle

 Recognizes and identifies size concepts -- large, small

 Recognizes and identifies position concepts

 Recognizes and identifies number concepts -- one, two

Examples:

- a. The children can paste realistic representations of facial features on an outline of a head drawn on a large piece of manilla paper. Focus on position concepts and number sets of one and two.
- b. The children can construct a face using one basic shape and one primary color. A large whole circle could be used for the head with small circles of one color to be used for the eyes, nose, and mouth. Focus on recognition and identification of position, color, size, number, and shape concepts.

7. (cont.)

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

- c. Recognizes and identifies color concepts -- red, yellow, blue Recognizes and identifies shape concepts -- circle, square, triangle

 Recognizes and identifies size concepts -- large, small Recognizes and identifies position concepts

 Recognizes and identifies number concepts -- one, two
- d. Describes face using labels for color, shape, size, and number concepts
- c. If the children have learned several shapes and colors, this activity can be used as a review of colors and shapes. Parts of the face can be made of red, yellow, and blue circles, squares, and triangles. Size concepts can be reviewed or developed by using a large circle for the head and small circles for eyes, a large triangle for a hat

and a small one for the nose.

Position concepts and number sets would be emphasized as well as color, size, and shape concepts.

d. A box of construction paper pieces of three shapes, three colors, and two sizes could be placed on the table. Each child could select whatever pieces he wished for his facial features. Give each child a round piece of white paper for the face. When the faces are completed, each would be asked to describe the color, shape, size, and number of the pieces he used for the face, eyes, ears, nose, and mouth.

- We use our legs and feet to move from one place to another and to walk, jump, run, hop, skip, dance, and kick.
- 2. We use our arms to move and carry objects.
- 3. We use our hands and fingers to touch, grasp, and carry objects, to clap to music, and to make signals and gestures.
- 4. We use our eyes to see.
- 5. We use our ears to hear sounds.
- 6. We use our nose to help us breathe and to smell odors.
- We use our mouth to eat, talk, sing, whistle, and breathe.
- 8. We use our teeth to chew food and to help us speak clearly.
- 9. Our skin protects our body from rough objects.
- 10. Our hair helps to keep us warm in cold weather.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on teacher as she gives directions for game and points to body parts Distinguishes body parts

Auditory Skills

Listens to directions during game
Listens to questions during game

ABSTRACTING SKILLS

Conceptual Skills

Knows concept of body
Knows body parts
Knows facial parts
Knows uses of body parts and
facial parts

1. Basic Activity

Play a short direction game, asking the children to move or point to different parts of the body.

Examples: Close your eyes. Shake your hands. Nod your head. Then focus on one body part at a time and see if the children can tell you the use(s) for each part. Move from the largest, obvious parts such as legs, arms, feet, hands to eyes, ears, nose, mouth, skin, hair. Refer to the children's body parts to encourage responses.

Examples: What can Bobby do with his legs? Pretend that Bobby does not have any legs.

When you move to parts of the face, have the children cover their ears, pinch their nose, and hold their lips closed to aid them in giving uses for the eyes, ears, nose, and mouth.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

Conceptual Skills (cont.)

Recognizes motion concepts -close, open, blink, wiggle,
nod, tap, clap, shake, feel,
touch, hold, lift, carry,
walk, run, jump, climb, hop,
eat, chew, drink

Association Skills

Relates each body part with its use Relates each body part and each concept with its label

RESPONSE SKILLS

Verbal Skills

Identifies uses of body parts

Motor Skills

Follows directions in game Dramatizes uses of body parts

1. (cont.)

With each body part, have the children dramatize all the uses which they can give. Whenever possible, give them additional uses which they have not verbalized. Use actions and objects to illustrate each of the uses.

Evaluation

To close the activity, ask each child to name a use for one body part as you point to it. When you point to any one part a second or third time, encourage the child to name a use which is different from those already named for that part. Call on the least advanced children for the simple, more obvious ones. Note carefully the parts for which the children can give few uses. Then plan other activities which concentrate on the uses of these parts.

- We use our legs and feet to move from one place to another and to walk, jump, run, hop, skip, dance, and kick.
- We use our arms to move and carry objects.
- 3. We use our hands and fingers to touch, grasp, and carry objects, to clap to music, and to make signals and gestures.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on teacher as she demonstrates body actions and gives directions

Auditory Skills

Listens to record
Listens to directions for
dramatization
Distinguishes the rhythm of the
music

ABSTRACTING SKILLS

Conceptual Skills

Knows body parts
Knows uses of body parts
Recognizes motion concepts -dance, stomp, run, walk,
jump, hop, sway, gallop,
skip, wiggle

Association Skills

Relates "listening ears" with careful listening
Relates rhythm with body movement
Relates each motion concept with its label

2. Basic Activity

Select an appropriate rhythm record to dramatize different body actions. First play the record for the children to listen to the music. Introduce the idea of "good listening ears." As you listen to the music with the children, demonstrate different body actions which the music suggests to you.

Examples: That music makes me feel like running...like hopping...like dancing.

Encourage the children to suggest appropriate actions to correspond with the music.

Space the children around the classroom. As you play the record again,
give them different action directions
to dramatize. Be sure that your directions correspond with the speed and
rhythm of the music being played.

Evaluation []

Make careful observations to see which children have understood the directions and how well they can move with the rhythm.

2 / namb)	
2.(cont.)	
 Extension Activities a. Conduct similar activities with this record or others. Encourage the children to suggest the actions to be dramatized. b. Teach the children several fingerplays, action songs ("Busy"), and songs from records which concentrate on the different movements of legs, arms, feet, hands, toes, and fingers. Use these activities to develop the many different motion concepts which are illustrated. 	

 We use our hands and fingers to touch, grasp, and carry objects, to clap to music, and to make signals and gestures.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on hands and objects

Auditory Skills

Listens to labels for objects
Listens to labels for textures
as objects are handled
Listens to directions for
playing game

Tactile-Kinesthetic Skills

Discriminates differences in textures among the objects

ABSTRACTING SKILLS

Conceptual Skills

Knows wood, stone, cotton, bark,
 pine cone, dough, paper, silk,
 fur

Recognizes texture concepts -hard, soft; rough, smooth;
thick, thin

Knows an object by touching it

Association Skills

Relates each object with its texture

Relates each object and each concept with its label

Classification Skills

Comprehends classes of objects which are soft, hard, rough, smooth, thick, thin

3. Basic Activity

Make a "Feel It" Box which includes materials and objects having a variety of textures.

Examples:

pieces of wood (hard, rough) a stone (hard, smooth) cotton (soft, fuzzy) tree bark (rough) pine cone (rough, prickly) dough (soft, sticky) paper (smooth, thin) silk (smooth, thin, slippery) fur (soft, fuzzy, thick)

Use the box in an activity to develop tactile discrimination and texture concepts.

Begin the activity with a fingerplay or poem about our hands. Then direct the children's attention to their own hands and ask them to tell you all the ways they use them. Be sure that "touching objects" is a use included in the discussion. Introduce the "Feel It" Box in a game fashion. Display one object or piece of material at a time and ask the children to name each one. Give them labels for the materials they cannot identify and return to these a second time. Then proceed to discussing how the objects feel. Present pairs of objects which illustrate opposite texture concepts -- hard, soft; rough, smooth; thick, thin -such as wood and cotton. With each pair, move around the group as you direct each child to feel both materials. Discuss with the children how each feels.

INSTRUCTIONAL ACTIVITIES BASIC SKILLS TO RE DEVELOPED RESPONSE SKILLS 3. (cont.) Verbal Skills Encourage the children to identify the Labels objects textures. Identifies texture concepts Identifies object which is Evaluation touched but not seen To close the activity, ask each child to take one material from the box without looking. Ask him to identify Motor Skills the object and tell something about Selects object from box Feels object in order to label how it feels. Then ask the group to think of other objects which feel soft, and identify texture hard, rough, smooth, thick, thin. During snack and lunch times, discuss the textures of objects in the class-Extension Activities The "Feel It" Box can be used many times throughout the year to extend the development of tactile discrimination. Some suggestions are: a. Discriminates, recognizes, and a. Use the box to develop other texture identifies texture conconcepts: fuzzy, sticky, prickly, cepts -- fuzzy, sticky slippery, etc. prickly, slippery b. Discriminates, recognizes, b. Use the box later to refine disand identifies fine difcriminations by comparing and ordering the objects. ferences in texture Examples: Find something Uses comparative statements softer than the wood; find something harder than cotton; find the softest object in the box; etc. c. Discriminates, recognizes, c. Use the box to develop concepts of and identifies weight conweight -- heavy and light

cepts -- heavy, light

BASIC SKILLS TO 3E DEVELOPED	INSTRUCTIONAL ACTIVITIES
	3. (cont.)
d. Recognizes and identifies object by touch only Identifies texture and weight concepts	d. Play a Blindfold Game with the box. Blindfold one child at a time. Ask him to select an item from the box, identify it and/or describe how it feels.
e. Describes textures of objects without touching the objects	e. As the children learn to discriminate and identify different textures using many concrete objects, begin to use some books which focus on touch (My Bunny Feels Soft, My Hands, What Is Your Favorite Thing to Touch).
f. Sorts objects by textures	f. When the children have developed concepts of basic textures, add more objects to the box so that the children can sort or classify them according to the different textures.

3. We use our hands and fingers to touch, grasp, and carry objects, to clap to music, and to make signals and gestures.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on hands and paper models of hand
Isolates each child and each model hand when counting

Auditory Skills

Listens to questions and directions

ABSTRACTING SKILLS

Conceptual Skills

Recognizes color concepts -red, yellow, blue
Recognizes number sets -one to five
Knows song name for each finger

Association Skills

Relates a paper finger with each finger named in song

RESPONSE SKILLS

Verbal Skills

Identifies color concepts
Counts children, paper hands, and
fingers, one-by-one to ten
Identifies number sets
Reproduces melody, rhythm, and
words of song

Motor Skills

Manipulates scissors to cut on
a line
Stands when color of his paper
is named
Pairs paper fingers with real
fingers
Points to correct finger during

4. Basic Activity

Make red, yellow, and blue construction paper hands to use for number activities. Ask each child to choose and identify the color of paper for his model hand. Trace the outline of each child's hand (fingers spread) on red, yellow, or blue construction paper and print the child's name on the palm. Cut out the hand. (If a child is skillful in handling scissors, he should be encouraged to cut the hand himself. While you are working with individual children, give those who are waiting or finished some newsprint and crayons to trace their own or each other's hand.

When the model hands are finished, use them for a color and number game. Work with a group of six to ten children at a time. Arrange the children in a circle or semi-circle. The following activities are suggested:

- a. Together count the number of children in the group; then count the number of paper hands. Emphasize the fact that there is a paper hand for each child; there are as many paper hands as children.
- b. Ask the children with red hands to stand in front of the group. Count the hands; count the children with red hands. Use the words "set of red hands" and emphasize the number of the set. Use the same procedure for the blue and yellow hands.
- c. Ask the children to count the fingers on their real hand; then, on their paper hand. Emphasize the "set of five fingers." Ask the

BASIC SKILLS TO BE DEVELOPED INSTRUCTIONAL ACTIVITIES 4. (cont.) children to place their real hand on top of their paper hand, and tell you if there is a paper finger for each real finger. d. Using the paper hand, ask the children to find Mr. Thumbkin, Pointer, Middleman, Ringman, and Pinky (Little Man). Then sing "Where's Mister Thumbkin?" using the model hand. Ask the children to point to the correct paper finger as you sing each verse.

Evaluation

Note how well each child could do the following: (1) identify the colors of the paper hands; (2) count paper hands and fingers; (3) pair paper fingers with real fingers; (4) identify number sets one to five.

Extension Activities

Use the fingers as "material" in activities designed to develop number concepts and relationships. Find fingerplays and games which involve counting and number sets which you can use with these math activities.

- a. Use the fingers for counting games -- one-by-one counting from one to five and one to ten.
- b. Use the fingers to develop the concept of one-to-one correspondence. Each finger on one hand can be matched or paired with a finger on the other hand.
- c. Use the fingers of one hand to work with number sets from one to five.

4. We use our eyes to see.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on image of eyes in mirror Focuses attention on objects Discriminates likenesses and differences among objects

Auditory Skills

Listens to labels for eye parts and eye motions
Listens to directions

ABSTRACTING SKILLS

Conceptual Skills

Knows eye and eye parts
Knows objects
Recognizes motion concepts - open, shut; wink, blink
Recognizes color concepts - brown, blue, green
Understands concepts of same and
 different

Association Skills

Relates own eyes with mirror image of eyes
Relates "looking glasses" with careful looking
Relates each eye part and each concept with its label

RESPONSE SKILL

Verbal Skills

Labels eye, eye parts, and
eye motions
Identifies color of eyes
Labels objects
Identifies objects as same or
different

5. Basic Activity

Give each child a hand mirror to look at his eyes while you discuss them. Together, label and describe the parts around the eyes such as lid, eyelashes, eyebrows. Introduce the labels for eye motions -- open, shut, blink, wink -- and have the children demonstrate each with you. Ask each child to identify the color of his eyes as you collect the mirrors.

Introduce the idea of imaginary "looking glasses." Circle your eyes with your thumbs and index fingers and explain that when you do this you want them to put on their "looking glasses" to look very carefully at something. Tell them you are going to show them objects, and you want them to look very closely at them. Show the children two objects which are identical (such as two cups the same color, shape, and size) and one object completely different from the other two (such as a spoon). Ask if someone can tell you which object is different, which are the same, and why. If the children cannot respond appropriately, spend time developing the concepts of "same" and "different." Then move on to other sets of objects, two like objects and one different in each set. Use objects which are already familiar to the children so they will focus only on likenesses and differences. Between each different set of objects, remind the children to keep their "looking glasses" on.

BASIC SKILLS TO BE DEVELOPED INSTRUCTIONAL ACTIVITIES Motor Skills 5. (cont.)

Reproduces eye motions
Reproduces gesture for "looking glasses"
Selects objects which are the

same and different

Evaluation

Display all the objects used in the activity. Point to one object. Ask a child to find an object that is the same as the one you designate and then to find an object that is different. Continue to point to objects until every child in the group has had a turn. Note carefully those children who have difficulty in order to plan additional activities of this sort for them.

5. We use our ears to hear sounds.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Auditory Skills

Listens to discussion of ears
Listens to directions and sounds
Discriminates likenesses and
differences among sounds

Knows ears and their use Recognizes sounds

Association Skills

Relates each sound with its source

RESPONSE SKILLS

<u>Verbal</u> <u>Skills</u>

Identifies sounds and their sources

Motor Skills

Reproduces gesture for "listening ears" Covers eyes with hands

6. <u>Basic Activity</u> Have a short re

Have a short review discussion on the ears and their use. Prepare the children for a listening game by telling them to put on their "listening ears" and to cover their eyes with their hands. Move around the room, making different sounds which should be familiar to the children. After making each sound, stop and ask the children what makes the sound. If no one can identify the source, repeat the sound. If there is still no response, show the children how you made the sound. Examples of sounds: walking on

the floor, running water, tapping a pencil, coughing, sneezing, laughing, closing a door, scraping a chair.

Evaluation

At the end of the activity, repeat the sounds which were difficult for the children to identify.

- a. Reproduces sounds for others to identify
- b. Discriminates, recognizes, and identifies "outside" sounds

Extension Activities

- a. Play the game again during the unit and have the children take turns making the sounds for the others to identify.
- b. Later record on tape a variety of familiar sounds that the children might hear outside their homes or near the school. Play the tape for the children and ask them to identify the source of the sound. Note which sounds seem most unfamiliar

a-36

UNIT UNDERSTANDING: C. Each part of the body has a special use.

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
	6. (cont.) to the children. Make a point to listen for these sounds and others whenever you are outside for play or for a walk. Then repeat this activity to see if the children have learned to identify the sounds.

5. We use our ears to hear sounds.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Auditory Skills

Listens to directions and sounds Discriminates likenesses and differences among the sounds made by the containers

ABSTRACTING SKILLS

Conceptual Skills

Understands concepts of same and different

Association Skills

Relates sound with its possible origin or cause

RESPONSE SKILLS

Verbal Skills

Identifies sounds as same or different Guesses contents of container

Motor Skills

Shakes containers appropriately Selects the correct container to make a matching pair

7. Basic Activity

A fun auditory discrimination game can be played with a teacher-made "Sound Matching" Box. Find 12 containers (plastic medicine jars or pill bottles) to make six pairs of shakers. Place an equal amount of rice in two of the jars, making sure that the jars make identical sounds when shaken. Make four more pairs of shakers using different materials such as salt, pins, paper clip, rubber band. Leave the remaining pair of jars empty. Put the 12 shakers in a small box. Each child can take turns selecting a jar and finding its mate with the same sound. Encourage the children to guess what might be inside the jars.

Evaluation

Note which children have difficulty matching the sounds. Give them opportunities to work individually with the sound box in a quiet place. Some children will find the task easier if they work with fewer pairs of shakers at first (perhaps just two or three pairs).

Extension Activity

Later the children can help make additional pairs of shakers. Have them look for materials in the class-room or outside (gravel, crayons, tacks, nails) and make pairs of shakers which sound "just alike."

5. We use our ears to hear sounds.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Auditory Skills

Listens to songs and voices
Listens to directions
Discriminates likenesses and differences in volume
Discriminates likenesses and differences in pitch

ABSTRACTING SKILLS

Conceptual Skills

Recognizes volume concepts -- loud, soft Recognizes pitch concepts -- high, low

Association Skills

Relates each concept with its label

RESPONSE SKILLS

Verbal Skills

Reproduces voice volume and pitch as directed

Identifies voice as loud, soft, high, low

Directs other children to vary volume and pitch

8. Basic Activity

Use songs which the children already know to demonstrate how sounds can vary in volume and pitch. Introduce the concepts of loud and soft sounds, then high and low sounds as you sing the song to illustrate each concept.

Evaluation

Ask each child to say his name four different ways: with a loud, soft, high, and low voice. Then vary your own voice and ask the children to identify how you are talking. Encourage the children to use the words "soft," "loud," "high," and "low" by asking individual children to give directions to the other children to talk a certain way.

Recognizes, identifies, and reproduces variations in volume and pitch when altered simultaneously

Extension Activities

Later these concepts can be combined to have the children sing or talk using loud, low voices; soft, high voices, etc.

6. We use our nose to help us breathe and to smell odors.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Auditory Skills

Listens to directions
Listens to labels for odors

Taste-Olfactory Skills

Discriminates likenesses and differences among odors

ABSTRACTING SKILLS

Conceptual Skills

Knows concept of nose and its use Knows substances in containers Recognizes substances by odor only Understands concepts of same and different

Association Skills

Relates each odor with its source Relates each substance and odor with its label

RESPONSE SKILLS

<u>Verbal</u> <u>Skills</u>

Identifies substances as same or different
Identifies substances by odor only

Motor Skills

Selects the correct container to make a matching pair Selects the substance which is named by the teacher

9. Basic Activity

Play a "Smell It" game. Fill small containers with a variety of familiar materials having very distinctive odors. Some suggested substances could be perfume, vinegar, peanut butter, onion, paste, or others with which the children are familiar. Fill two containers with each one of the substances.

Blindfold a child. Give him a container to smell and instruct him to smell each of the other containers to find one which smells the same as his. When he has found a matching container, encourage him to identify the substance. Supply the label for him if he cannot name it. Give each child a turn.

Assessment Activity

In a later activity, place just one container of each substance on the table. Blindfold one child at a time and instruct him to find a certain substance which you name. Encourage each child to identify all the substances as he smells the different containers to find the one you have named.

Extension Activities

As the children become familiar with different odors, particularly foods, play this game again using new substances in the containers.

- We use our mouth to eat, talk, sing, whistle, and breathe.
- We use our teeth to chew food and to help us speak clearly.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on teacher as she identifies mouth and its parts

Focuses attention on pictures in book

Auditory Skills

Listens to labels for mouth parts and their uses Listens to story and questions concerning story

ABSTRACTING SKILLS

Conceptual Skills

Knows mouth, tongue, teeth, lips,
and their uses
Understands contents of story
Understands story's sequence of
events
Understands simple questions
concerning story

Association Skills

Relates each mouth part with its use
Relates each mouth part and each use with its label

RESPONSE SKILLS

Verbal Skills

Labels mouth, tongue, teeth, lips Identifies uses of mouth parts Answers questions concerning story

10.Basic Activity

Ask the children to name all the different ways they use their mouths. Demonstrate each use as it is named, and indicate how the tongue, teeth, and lips are involved in each of the uses. Suggest uses which the children do not volunteer. Be sure to include whistling.

Read or tell the story Whistle for Willie as you show the children the pictures. Direct the children to put on their "looking glasses" and to look carefully at the pictures. Explain that pictures can tell a story.

Evaluation

Ask the children very specific questions about the story, moving from the beginning to the end. Make the questions very simple.

Examples: What was the boy's name? What did Willie want to be able to do?

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
Verbalizes freely in role-play, dramatization, conversation, recording on tape	Extension Activities One of the most important uses of the mouth is for talking. Plan many activities which encourage verbalization. Some suggestions are: a. Role-play situations using dolls, puppets, model people, paper dolls dress-up clothes, and telephones. b. Dramatizations of stories. c. Conversation between teacher and child and among the children at lunch and snack time. d. Frequent use of a tape recorder to encourage singing and talking.

- 6. We use our nose to help us breathe and to smell odors.
- 7. We use our mouth to eat, talk, sing, whistle, and breathe.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Auditory Skills Listens to directions

Taste-Olfactory Skills Discriminates likenesses and differences among flavors

ABSTRACTING SKILLS

Conceptual Skills

Knows concept of nose and mouth and their use for tasting Knows the items of food Recognizes the foods by taste only Understands concept of same and different

Association Skills

Relates each flavor with its source Relates each food and flavor with its label

RESPONSE SKILLS

Verbal Skills

Identifies flavors
Identifies foods by their taste only
Identifies flavors as same or different

ll.Basic Activity

Plan another blindfold game similar to the "Smell It" game in activity C-9. This time, have the children taste familiar foods and try to identify them. Some suggested items are: applesauce, peanut butter, pickles, orange, marshmallows, mint candy, chocolate candy.

Evaluation

Note which foods are not identified by each child. Give each an opportunity to taste these foods again at the close of the activity.

Extension Activities

As soon as the children can identify familiar foods by their taste, plan other activities to refine taste discrimination and develop flavor concepts:

BASIC SKILLS TO BE DEVELOPED INSTRUCTIONAL ACTIVITIES 11. (cont.) a. Discriminates, recognizes, and a. Have a tasting party to develop the identifies taste concepts -concepts of sweet, sour, bitter, sweet, sour, bitter, salty and salty. As the children taste such items as sugar, lemon juice, strong black coffee, and salt, supply the description label for each one. Provide opportunities for the children to taste, identify, and describe many foods which have these characteristics. b. Understands that sugar is a b. Plan a demonstration to show how sweetener something sour can be made sweet by the addition of sugar. As a group, make lemonade from real lemons. Have each child taste and describe the liquid before and after the sugar is added. c. Discriminates, recognizes, and c. Have tasting parties using items of identifies flavor concepts -food with common flavors such as grape, cherry, orange, lemon, pepgrape, cherry, orange, lemon, permint, chocolate, cinnamon, peppermint, chocolate, cinnamon, vanilla vanilla. Provide opportunities for Relates flavor with its source the children to see and taste the and identifies source object from which the flavor originated (a lemon, an orange, a cherry) and to sample various products containing the flavor extract. Candy, cookies, cake, juice, and jello make good samples for such an activity. If possible, plan lunch and snack menus to include many of these foods all during the year.

- We use our hands and fingers to touch, grasp, and carry objects, to clap to music, and to make signals and gestures.
- 4. We use our eyes to see.
- 6. We use our nose to help us breathe and to smell odors.
- 7. We use our mouth to eat, talk, sing, whistle, and breathe.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on ingredients and procedure for cooking

Auditory Skills

Listens to explanation of procedure and labels for ingredients
Listens to questions

Tactile-Kinesthetic Skills

Discriminates likenesses and differences in texture and temperature

Taste-Olfactory Skills

Discriminates likenesses and differences in flavors

ABSTRACTING SKILLS

Conceptual Skills

Knows milk, water, cocoa, sugar,
liquid, powder, steam
Recognizes texture concepts -wet, dry
Recognizes temperature concepts -hot, cold
Recognizes taste concepts -- sweet,
bitter
Understands sequence of preparation

12.Basic Activity

Make hot chocolate in the classroom in an electric cooker to demonstrate all the things we can learn by using our hands, eyes, nose, and mouth.

The following procedure is suggested:

- a. Show the children the four ingredients -- milk, water, cocoa, and sugar -- and label them together.
- b. Compare the ingredients. Put a small amount of each one in a dessert dish. Place the four dishes on a tray and move around the group. As each child touches and looks at the four ingredients, talk about "wet" and "dry," "liquid" and "powder." Name other substances and ask the children to describe them as wet or dry. Ask whether the milk is hot or cold.
- c. Remove the dishes of milk and water from the tray and move around the group again. Ask each child to taste the cocoa and the sugar and discuss "bitter" and "sweet."
- d. Measure the ingredients. Mix the cocoa and sugar and discuss the fact that the mixture is still dry. Add the water and discuss what happens to the mixture as you stir it.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

Association Skills

Relates each ingredient and
each concept with its label
Relates combination of
ingredients with hot chocolate
Relates each ingredient with its
texture, odor, and taste
Relates steam with heat or hot
liquids

Classification Skills

Comprehends classes of liquids (milk, water) and powders (sugar, cocoa)

RESPONSE SKILLS

Verbal Skills

Identifies hot chocolate and its ingredients
Identifies texture, temperature, and taste of ingredients
Answers questions concerning ingredients and preparation

12.(cont.)

- e. Place the cocoa mixture in the cooker and stir in the milk. Ask the children to feel the outside of the cooker to see how cold it feels.
- f. Turn on the cooker and talk to the children about what is happening to the liquid.
- g. Direct the children's attention to the steam as a sign that a liquid is very hot. Have each come close to the cooker to feel the heat.
- h. Serve each child a cup of steaming hot chocolate. Leave a small amount of the hot chocolate in the cooker and set it aside in the room.

 Later in the day, have the children dip a finger into the liquid and discuss what temperature change has taken place.

Evaluation

As the children drink the cocoa, discuss how it was made. Review the labels "wet," "dry," "hot," "cold," "sweet," "bitter." Ask questions such as: "What did we put into the hot chocolate that was bitter?" "What two ingredients were wet (liquids)?" "What made the hot chocolate sweet?"

- 9. Our skin protects our body from rough objects.
- 10. Our hair helps to keep us warm in cold weather.

Knows skin and hair and the
 functions of each
Knows magnifying glass and its
 use
Recognizes size concepts - large, big; small, little

Association Skills

Relates skin, hair, and
magnifying glass with
their labels
Relates magnifying glass with
its use
Relates skin and hair with their
functions

RESPONSE SKILLS

Verbal Skills

Labels skin, hair, and
magnifying glass
Identifies size concepts
Identifies functions or uses
of skin, hair, magnifying
glass

13. Basic Activity

Discuss skin and hair with the children. Have them locate the skin and hair on their bodies. Explain to the children how each of these parts is used for protection. Use a magnifying glass to give each child an opportunity to look closely at his skin. Give the children the label for this object. Demonstrate its function and describe its use using the words "large" (big) and "small" (little). As each child looks through the glass, point out the tiny hairs on his arms and legs.

Evaluation

During the activity, note whether or not each child can (1) label skin and hair, and (2) use the labels "large" and "small" appropriately.

- l. Each piece of clothing has a name.
- Some clothes are worn by males.
- 3. Some clothes are worn by females.
- 4. Some clothes are worn by both males and females.
- 5. Clothes help protect our bodies.

ABSTRACTING SKILLS

Conceptual Skills

Knows concept of clothing and specific articles of clothing Recognizes number concepts

Association Skills

Relates each article of clothing with its label Relates certain clothing with girls, with boys, or with both

Classification Skills

Comprehends classes of girl's clothes and boy's clothes

1. Basic Activity

Discuss with the children the fact that the objects we wear on our bodies are called clothes or clothing and that each different piece of clothing has a special name. Select a girl to come to the front of the group. With the children's help, identify each article of clothing she is wearing. As each is named, ask all those who are wearing the same article to raise their hands. Then select a boy and repeat the procedure.

Play a direction and counting game. Ask all the children wearing dresses to stand. Then count how many children are wearing dresses. Emphasize that all those children wearing dresses are girls. Ask all those wearing shoes to stand. Count the children. Indicate that both boys and girls wear shoes. Continue naming articles of children's clothing, counting the children wearing each article and indicating who wears it -- boys, girls, or both.

Evaluation

At the close of the activity, ask each child to name the articles of clothing he is wearing. Note which children are having difficulty. If a child cannot label his clothing, give the names and ask him to point to each one.

a-48

UNIT UNDERSTANDING: D. We wear clothes on our bodies.

BASIC SKILLS TO BE DEVELOPED INSTRUCTIONAL ACTIVITIES RESPONSE SKILLS

Verbal Skills

Labels articles of clothing
Identifies an article of
clothing as to whether it
is worn by girls or boys
Counts children one-by-one

Motor Skills

RESPONSE SKILLS

Verbal Skills

Labels body parts and articles
of clothing
Identifies the colors and positions
of the articles of clothing

Motor Skills

Selects articles of clothing as verbally directed
Places felt clothing on flannel figure

2. Basic Activity

Make the flannelboard set Willie the Weatherboy (DARCEE), or use a felt figure of a boy from a commercial material. Introduce the figure by telling the children the boy's name or by asking the children to name him. Show the children the felt clothing and involve them in dressing the boy figure. Ask the more verbal children to suggest the articles of clothing. As each piece is named, ask a child to find that article of clothing and place it on the figure. Discuss the placement of each article in terms of body parts and position.

Examples: John put the shirt on his chest, above the pants.

When the figure is dressed, play a color game using red, yellow, and blue shirts, pants, and jackets. Give each child a turn to place a certain color shirt, jacket, or pair of pants on the figure. For the more advanced children, give two directions at a time.

Example: Mary, can you dress ___ in a red shirt and blue pants?

Evaluation

Every time the clothing is changed, ask different children to describe what the boy is wearing. Encourage them to name the articles of clothing and to identify the color of each.

- l. Each piece of clothing has a name.
- 2. Some clothes are worn by males.
- 3. Some clothes are worn by females.
- 4. Some clothes are worn by both males and females.

RESPONSE SKILLS

Verbal Skills

Identifies articles of clothing
Identifies the uses of clothing
Identifies clothing by class to
which it belongs
Suggests reasons for wearing
clothing

5. Basic Activity

Ask the children questions to stimulate them to tell you why they think we wear clothing on our bodies. If they do not verbalize any ideas related to protection, discuss specific situations to lead them in this direction.

Examples: (1) Describe a rainy day and ask them what would happen to us if we wore no clothes. (2) Describe walking on rough stones with no shoes. (3) Describe walking through bushes with no clothes on our bodies.

Introduce the word "protect" and review the mentioned situations to develop the concept.

Assessment Activity

Give the children magazines and scissors to look for and cut out clothing pictures. When each child has found several pictures, collect the scissors and magazines. Place pictures or models of a man, woman, boy and girl in front of the children. Ask each child to select one of his pictures, identify it, tell which figure or figures would wear this article of clothing. Continue taking turns until all the pictures are sorted.

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
Motor Skills Manipulates scissors to cut out clothing pictures	Extension Activity The children might enjoy making a clothing poster with their pictures Draw lines on a large piece of tagboard or newsprint to make four quarters. Paste the pictures of the man, woman, boy, and girl on the poster, placing one figure in each quarter. The children could paste the appropriate clothing in each section of the poster.

UNIT UNDERSTANDING: E. We are all alike in many ways.

- 1. We have the same basic body parts.
- 2. We have the same basic needs.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on children, pictures, and objects
Discriminates likenesses and differences among people
Discriminates among objects and actions in pictures

Listens to discussion, questions, and song words Distinguishes melody and rhythm of song

ABSTRACTING SKILLS

Conceptual Skills

Knows objects and their uses
Knows action concepts -- eat,
 drink, sleep, wash, brush,
 comb, etc.
Understands concept of alike

Association Skills

Relates real object and action with picture of object and action

Relates real objects, pictured

Relates real objects, pictured objects, and activities with their labels

RESPONSE SKILLS

Verbal Skills

Identifies ways in which people are alike
Identifies common activities and needs
Labels real objects
Labels objects and activities in pictures

1. Basic Activity

Ask the children to identify the ways that all people are alike. Encourage them to look at you and each other to find clues. Encourage them to think about ways we all look alike and things which all of us can do. If they cannot name common activities and needs, ask questions to help them verbalize that we all eat, drink, sleep, wash, etc. Show the children pictures (Teaching Pictures) of the ways we care for our bodies in order to be well or healthy -- sleeping, eating, washing hands and face, taking a bath, brushing teeth, getting sunshine and exercise, combing hair. With each picture, discuss why this activity is important and what happens if it is not done. Use actions and objects (spoon, washcloth, soap, toothbrush, comb, and brush) to dramatize each activity. With each picture discussion, ask questions (what, why, when) and give the children information only when they cannot provide it.

Teach the children the tune to "The Mulberry Bush." Sing about the activities you discussed.

Examples: (1) This is the way we eat our food, (2) ...brush our hair, (3) ...wash our face.

As you sing each verse, dramatize the activity using appropriate actions and objects. Ask different children to stand before the group and imitate the verses by pointing to one of the pictures or by selecting an object and demonstrating the activity.

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on children Discriminates likenesses and differences among physical characteristics of children

Auditory Skills

Listens to directions and questions

ABSTRACTING SKILLS

Conceptual Skills

Knows body parts
Knows articles of clothing
Recognizes likenesses and
differences in color, size,
and texture

1. Basic Activity

Plan a likeness and difference activity comparing children in the classroom. Ask a boy and a girl to stand in front of the group. Ask the other children to identify all the ways that the two children are alike. If they need encouragement to respond, ask questions.

Example: What do you see that both these children have? (clothes, arms, legs, hair, etc.)

When the group has identified many likenesses, ask the children in what ways these two children are different. Ask questions to focus attention on differences in size, skin color, hair color and length, eye color, sex, clothing.

Evaluation

Select another pair of volunteers for comparison. Ask each member of the group to identify one difference in the two children.

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
Verbal Skills Identifies ways in which two childern are alike and different including dimensions of color, size, and texture Uses comparative statements taller, shorter; bigger, smaller; lighter, darker; shorter, longer	1. (cont.) Note which children can and cannot identify likenesses and differences and which dimensions of comparison are difficult for the group as a whole. Plan additional activities for certain children or for the total group.
	Extension Activities a. Plan an activity in which the children compare the characteristics of two children using large pictures or models of children (Judy Story Sets). b. If you have taken a picture of each child in the class, plan small group activities in which the children can compare each other while looking at their pictures. c. With more advanced children, use books pertaining to differences in human characteristics (Straight Hair, Curly Hair; Your Skin and Mine; Look at Your Eyes).

We are different sizes.

BASIC SKILLS TO BE DEVELOPED

Discriminates likenesses and differences in height among children and among height marks
Discriminates self portrait and name from those of other

Auditory Skills Listens to directions and

children.

istens to directions and guestions

RESPONSE SKILLS

Verbal Skills

Identifies size concepts
Uses comparative statements - taller, shorter; tallest,
 shortest

Motor Skills

Draws image of self
Orders self and others by
increasing height
Finds a height mark taller than
and shorter than the designated
mark

2. Basic Activity

Make a chart showing the height of each child to use for size comparisons. Make a marker for each child by cutting white tag board strips approximately 2" wide and 45" - 50" long. Attach the strips to a wall of the classroom. Place the strips parallel to each other in a vertical position with the bottom of each strip just touching the classroom floor. Have each child draw his own "portrait" to attach to the top of his strip. Place a name card for each child above his portrait.

Work with small groups of five or six children at a time. Focus on the concepts of tall and short by comparing your height with that of one of the children. Then compare two children to establish which one is the taller and which is the shorter of the two. Then show that the taller of the two becomes the shorter when compared to you. After comparing the heights of the children, see if they can order themselves in a line from shortest to tallest. Have one child at a time stand against his strip on the wall. Place a piece of cardboard on his head to designate his height. the cardboard steady as the child stands on a chair and makes a line (with a felt pen) on his strip to mark his height.

Assessment Activity

After the heights of all five children have been marked, ask individual children to compare the marks and find the tallest and shortest marks. Point to a mark and ask a child to find one which is taller, and then one which is

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
	shorter than the mark to which you point. Continue this procedure until every child has had a turn. If the children have difficulty discriminating among the heights of the marks, cut off the tops of the strips right on the height line. If the children have no trouble comparing the height marks, leave the excess at the top of the strip so that you can mark the child's height several times during the year as he grows.
b. Discriminates, recognizes,	Extension Activities a. After completing the unit, remove the strips and store them. Every three or four months, repeat the basic procedure in this activity to dramatize the fact that the children are growing. Each time you measure, use a different color pen to draw the height line. b. Plan other activities where you
and identifies size concepts fat, thin	compare people in terms of being fat or thin. Collect magazine pictures of people of different sizes for the children to compare.

which indicate general age
categories

Auditory Skills

Listens to discussion, directions, and questions

ABSTRACTING SKILLS

Conceptual Skills

Recognizes size concepts -big, little; short, tall
Recognizes texture concepts -wrinkled, smooth
Understands age concepts -young, old; younger, older

Association Skills

Relates certain physical characteristics with young, old; younger, older

RESPONSE SKILLS

Verbal Skills

Identifies age according to certain physical characteristics Uses comparative statements -- younger than, older than

Motor Skills

Manipulates scissors

3. Basic Activity

Ask each child how old he is. Discuss age with the children.

Examples: Who do you think is older, you or your teacher?...Your teacher is older than you; she has lived a much longer time than you. Who do you think is older, you or your mother (daddy)?...Your mother and daddy are also older than you because they have lived much longer than you. Who is younger, you or your baby brother (sister)?...

Age is a difficult concept for children to grasp. Try to keep your examples simple and concrete. Use magazine pictures of babies, children, parents, and old people to illustrate age differences. Discuss with the children the physical characteristics of the figures which give clues to their age (size, hair color, skin texture, etc.).

Assessment Activity

Give each child a picture magazine and ask him to find and cut out pictures of someone older than he is and younger than he is. Ask each child to describe the age of the figures he finds in relation to himself (which are younger than he; which are older than he).

RESPONSE SKILLS

Verbal Skills

Reproduces melody, rhythm, and and words of song

Identifies children's voices

4. Basic Activity

Discuss with the children the fact that each one of them has his own special voice which is a little different from anyone else's. Ask the children to select several songs to sing. As they are singing, move around the group with a tape recorder and record the voices of several individual children and yourself. Ask the children to listen carefully while you play the tape. Encourage the children to identify the different voices as they hear them played. Do this several times in order that every child has an opportunity to record and hear his own voice. Explain that we can identify the voices because each one is different from all the others.

Assessment Activity

Play a game with the children. Blindfold one child. Point to another
child to speak and see if the blindfolded child can identify the voice.
Give each child a turn at both being
blindfolded and speaking to be identified.

8. We have different abilities.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on other children and the leader

Auditory Skills

Listens to discussions and directions

ABSTRACTING SKILLS

Conceptual Skills

Recognizes motion concepts modeled by leader Understands concepts of easy and hard

RESPONSE SKILLS

Verbal Skills

Identifies a task as easy or hard

Motor Skills

Reproduces the actions modeled by the leader

5. Basic Activity

Ask each child to do several motorcoordination tasks such as button a shirt, zip a zipper, fasten snaps, tie shoe laces, run a race, balance on a board, hop, skip, jump. When selecting such activities, be sure to include something that each child can do.

After each child has completed the selected tasks, ask him which was the easiest for him to do and which the hardest. Direct the children's attention to the fact that we are different in what each one finds easy and difficult to do. Then discuss how other school activities, such as pasting, painting, listening to stories, cutting, are easy for some children and difficult for others.

Assessment Activity

Teach the children the game "Follow the Leader." The teacher can be the first leader. Then let the children volunteer to be leaders. Each leader will differ in what he asks the group to do, depending on his abilities.

Extension Activity

Play the game all year to note how the abilities of different children change as a result of new experiences and practice.

9. We have different interests or likes and dislikes.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on the activities available for choice

Auditory Skills

Listens to discussion
Listens to choices available
for "selected activity"

ABSTRACTING SKILLS

Conceptual Skills

Understands concepts of like and dislike
Understands concept of choice

RESPONSE SKILLS

Verbal Skills

Identifies likes and dislikes
Identifies a choice of activities

6. Basic Activity

Discuss the fact that we are different in what each of us likes and dislikes. Ask each child to name his favorite food. Make a list of all those mentioned, and then review all the different foods that were mentioned as favorites. Ask each child which food he likes least (or dislikes most). Repeat the same procedure as with the favorite foods.

Continue the survey of likes and dislikes using smells, sounds, songs, school materials, etc. If songs are used, you may wish to sing a few of their favorites.

Assessment Activity

Introduce a "selected activity period" which is a block of time in the day when each child selects from three or four available activities something that he would like to do. Make sure that the activities are familiar to the children in order to encourage purposeful choosing. The objective during this choice time is to encourage each child to persist at a task which he likes.

At the beginning of selected activity period, have the three or four areas of the room set up with the materials which are available for that day. Explain to the children what activities are available, pointing to the area of the room where each activity will take place. Go around the group asking each individual child to make his choice as you name the three or four activities. Some suggested activities for early in the year might be wooden blocks in one corner of the room; role-play with dress-up clothes

a-68

UNIT UNDERSTANDING: F. We are different in many ways.

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
·	<pre>in another corner; puzzles at one table; paper and crayons or magazines, scissors, paste, and paper at another table.</pre>
	Extension Activities As the year progresses, continue using

As the year progresses, continue using the selected activity time once a day or several times a week. The choices offered should vary and the number of activities available should increase as the children learn how to use many different materials and develop the ability to make choices. Gradually include more school-type activities among the choices -- books, table games, water colors.

10. There are different ways that each of us feels at certain times.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

Understands affective concepts - happy, sad

Association Skills

Relates smile with happiness,
frown with sadness
Relates smile and frown with
their labels
Relates happiness and sadness
with particular circumstances

RESPONSE SKILLS

Verbal Skills

Labels smile and frown on children in pictures
Identifies affective concepts -- happy, sad
Uses negative statements -- not happy, not sad
Suggests circumstances which cause happiness and sadness

7. Basic Activity

Arrange the children's chairs in a semi-circle. Ask the children to look at the persons sitting next to them. Do they see happy or sad faces? Ask one of the less shy children to "put on" a happy face. The others should look at his face and tell how they know he is happy. Be sure that the children notice wide-open, bright eyes, and the turned-up edges of the mouth. Label this expression a "smile" and ask the children to suggest some things that make them happy.

Choose another child to "put on" a sad face and ask the others to describe it. Be sure that the children notice that the edges of the mouth are turned down, the eyes are droopy, and there are wrinkles in the forehead. Label this expression a "frown" and discuss the things that make us sad or unhappy.

When the children seem to understand the differences between a smile and a frown, pass out small hand mirrors and ask the children to look at themselves as they make smiles and frowns. Ask them to notice how their faces change when they change expressions.

Evaluation

Collect the mirrors and tell the children that now you are going to draw some faces and they are to decide which are happy and which are sad. On a chalkboard or large piece of paper, draw a happy face by making a large circle, round, wide eyes, and curved line with the ends turned down for the mouth. You might add tears, stating

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
a. Reproduces faces with happy and sad expressions Describes drawing using labels such as "happy," "sad"; "smile," "frown"	that sometimes when we are sad, we cry. Ask the children to identify the expressions you draw and tell why the face might be smiling or frowning. When discussing the frowning face, use the label "not happy" as well as "sad" to emphasize that sad is the opposite of happy. Extension Activities a. Give the children paper and crayons and ask them to draw smiling and frowning faces by modeling the ones that you have drawn. The children will probably indicate expression only by curving the mouth up or down; however, some may include details. Have the children describe the faces they have drawn.
b. Discriminates, knows, and reproduces words, melody, and rhythm of songs	b. Teach the children songs which stress affective concepts "I'm So Glad I Came to School Today" (DARCEE), "If You're Happy." Emphasize the appropriate facial expression while singing.

10. There are different ways that each of us feels at certain times.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on facial expressions
Isolates facial expressions in pictures of story
Discriminates among facial expressions

Auditory Skills

Listens to story and labels for affective states
Listens to directions, discussion, and questions

ABSTRACTING SKILLS

Conceptual Skills

Knows facial expressions
Understands affective concepts -glad, sad, bad, sorry, good,
frightened, brave, grouchy,
gentle, mean, happy
Understands the events in story

Association Skills

Relates facial expression with affective state
Relates affective state with particular circumstances
Relates each affective state with its label

RESPONSE SKILLS

Verbal Skills

Labels facial expressions
Identifies affective concepts
Suggests circumstances which cause
particular affective states

Motor Skills

Reproduces facial expressions modeled by teacher

8. Basic Activity

Read the book <u>Jack Is Glad</u>, <u>Jack Is Sad</u> to the children. Include only the emotions that the children are most likely to understand: glad, sad, sorry, good, frightened, brave, grouchy, gentle (or nice), mean, and happy. Be sure that the children notice how Jack's expression changes throughout the story. Model each one of the expressions and ask the children to reproduce it.

Assessment Activity

Play a "Go Fishing" game with study prints of various facial expressions (Understanding Our Feelings or magazine pictures). Place a large paper clip at the top of each picture and put them in a large basket. Give the child who is "fishing" a pole with a large magnet (hook) attached to a long string. Each child can have a turn fishing into the basket. When he "catches" a picture, he should hold it up for the others to see. Then ask him to identify the expression and to tell a "story" about the person in the study print, explaining why he looks that way. If the child cannot respond, prompt him by asking what would make him feel like the person in the pic-

10. There are different ways that each of us feels at certain times.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

<u>Visual Skills</u>

Focuses attention on plaques or pictures
Discriminates likenesses and differences among facial features

Auditory Skills

Listens to directions and questions

ABSTRACTING SKILLS

Conceptual Skills

Knows facial features
Understands concepts of alike
and different

RESPONSE SKILLS

Verbal Skills

Labels facial features
Identifies faces as alike or
different
Identifies the specific facial
features which are alike or
different

9. Basic Activity

With a small group of children, conduct a visual discrimination activity finding likenesses and differences among facial features (Perception Plaque Set or teacher-made faces on 3" x 3" cards). Make eight sets of three faces. In each set put two faces that are exactly alike and one that is different. Show the children a set of Plaques or cards and compare the three faces according to each feature (eyes, nose, and mouth). As a group, determine which two faces are the same, which one is different, and how it differs from the other two. Work with several sets of faces until the children understand the task.

Evaluation

Give each of the children a set of three faces. Ask them to look carefully at their pictures and decide which two faces are alike and which one is different. As each child raises his hand, ask him to tell which two of the faces are alike, which is different, and how it differs from the other two. When the children have completed their explanations to you, they may exchange sets of faces. Continue this procedure until each child has worked with several different sets.

UNIT UNDERSTANDING: G. Although we have many differences, we can work together as a group.

- 1. We need standards for sharing food, toys, and materials.
- 2. We need standards for taking turns.
- 3. We need standards for caring for our classroom materials.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on pictures
Isolates objects and actions in
the pictures

Auditory Skills

Listens to discussion and questions

ABSTRACTING SKILLS

Conceptual Skills

Understands concepts of sharing,
taking turns, helping, and
working together
Understands concept of a rule
Understands reason or reasons for a
rule

Association Skills

Relates situation in picture with real situation in the class-room or at home

RESPONSE SKILLS

Verbal Skills

Labels objects and actions in pictures

Identifies examples of sharing, taking turns, helping, and working together

Suggests reasons for a rule

1. Basic Activity

Locate several pictures which illustrate situations where children or adults are sharing, taking turns, helping each other, working together, and sharing ideas (Teaching Pictures --Social Development or magazine pictures). Displaying one picture at a time, encourage the children to describe what is in the picture and to "tell a story" about what is happening in the picture. Emphasize the words "sharing," "taking turns," "helping" as they are appropriate. With each different picture, use examples of familiar situations in the classroom to further develop the concept illustrated by the picture.

ture involving sharing, discuss the times during the day when sharing is necessary -- when using a limited number of materials of one kind like tricycles or blocks, or when eating at snack or lunch time. Ask the children to volunteer examples of sharing, taking turns, and helping at home. Encourage all the children to participate in the picture discussions.

Example: When focusing on a pic-

UNIT UNDERSTANDING: G. Although we have many differences, we can work together as a group.

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
	1. (cont.)
	Assessment Activity Discuss general classroom rules which encourage sharing, taking turns, or helping, and see if the children can suggest reasons why each rule is necessary. Example: Ask the children to think why you ask them to raise their hand to receive attention, why you ask them to speak in low voices during work period, or why you ask each child to clean up and put away one material before getting out another. Notice whether or not the children sense the necessity for simple classroom rules.
Identifies a classroom problem Suggests a rule to solve the problem	Extension Activities When classroom problems develop during the year, such as messy cupboards or high noise level, discuss the problem with the children and involve them in arriving at a rule to solve the problem.

UNIT UNDERSTANDING: G. Although we have many differences, we can work together as a group.

- 1. We need standards for sharing food, toys, and materials.
- 2. We need standards for taking turns.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

<u>Visual Skills</u>

Focuses attention on pictures in story
Discriminates among facial expressions of characters in the story

Auditory Skills

Listens to discussion, questions, and story

ABSTRACTING SKILLS

Conceptual Skills

Recognizes affective concepts
Understands concepts of friend and
enemy
Understands concepts of sharing,
taking turns, helping, and
solving problems

Understands the story content and the sequence of events in story

Association Skills

Relates certain characteristics with friend and enemy

RESPONSE SKILLS

<u>Verbal</u> <u>Skills</u>

Describes characteristics of a friend or enemy
Suggests solutions to problems between friends
Identifies affective concepts in story
Answers questions concerning story content and sequence of events in story

2. Basic Activity

Discuss with the children what it means to have a friend or to be a friend. Ask individual children to tell what a friend is. Describe several simple problem situations involving two children and ask the children how two friends would solve the problem.

Example: two boys with only one tricycle, two children and only one apple or cookie.

Use names of your children in the situations to hold their interest.

Read the story <u>Let's</u> <u>Be Enemies</u> to the children. Show the pictures as you read. Encourage the children to identify the feelings of James and John in the story.

UNIT UNDERSTANDING: G. Although we have many differences, we can work together as a group.

3. We need standards for caring for our classroom materials.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Auditory Skills

Listens to standards concerning
use of a material
Listens to song
Distinguishes melody, rhythm, and
words of song

ABSTRACTING SKILLS

Conceptual Skills

Understands concept of "clean-up time"

Association Skills

Relates song with clean-up time

RESPONSE SKILLS

Verbal Skills

Reproduces melody, rhythm, and words of song

3. Basic Activity

Every time you introduce a new piece of material to the children, be very certain to explain carefully and simply the rules for its use and care. From the beginning of the year, involve the children in collecting, cleaning, and putting away any materials they use for an activity.

Teach the children the song "It's Clean-Up Time." This song can be used daily to signal the end of an activity when clean-up is necessary before outdoor play, lunch, or snack.

Evaluation

Notice which children do and do not care for and help clean up materials. Give much attention and praise to those children who are helping.

Extension Activity

As the year progresses, the children should be expected to assume increasingly more responsibility for clean-up time.

- When we are very young, we are called babies or infants.
- 2. As we grow older, we are called children.
- 3. When we are full grown, we are called adults.
- When we become very old, we are called elderly.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on baby, baby objects, and pictures of babies Discriminates likenesses and differences between self and baby

Auditory Skills

Listens to discussion and questions

ABSTRACTING SKILLS

Conceptual Skills

Knows body parts and the function of each

Recognizes size concepts -- big, little; large, small; larger, smaller

Recognizes action concepts -- crawl, walk, cry, talk, coo

Understands age concepts -- young,
 old; younger, older

Understands sequence of human growth Knows objects and pictures of objects

Knows function of each baby object

Association Skills

Relates baby with certain objects and characteristics Relates each real or pictured object with its label Relates objects which have a similar function

1. Basic Activity

If at all possible, ask a mother to bring a baby to school. (A doll could be substituted.) Encourage the children to watch the baby and gently touch a hand or foot if the mother permits. Ask the children to name the ways the baby is like them and different from them. Be sure the children compare size, body parts, means of moving about, eating, communicating with others, number of teeth, amount of hair, and amount of independence. Discuss how they were all once this small (young). Good food, exercise, and care help us to grow from babies to children to adults.

Assessment Activity

Hold up various objects and pictures of objects which one associates with a baby. Ask individual children to label each object and tell why a baby uses or wears the object. Then ask the child to explain why he does not use or wear the same object. Whenever appropriate, ask the child what he uses or wears in place of the baby object.

Example: If the object is a bottle, the child would say that he uses a cup or glass for drinking because he is able to hold it. If the object is a bib, the child might say he doesn't wear one because he spills very little food. He may use a napkin instead.

UNIT UNDERSTANDING: H. Our bodies grow and change.

BASIC SKILLS TO BE DEVELOPED	INSTRUCTIONAL ACTIVITIES
RESPONSE SKILLS	
Verbal Skills Identifies way in which baby is alike and different from self Labels real objects and pictured objects Suggests objects which are	
similar in function to the baby objects	

2. As we grow older, we are called children.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on teacher and pictures in story

Auditory Skills

Listens to story, questions, and discussion

ABSTRACTING SKILLS

Conceptual Skills

Knows facial expressions
Recognizes affective concepts
Recognizes size concepts -- big,
little; large, small; bigger,
larger, smaller
Understands sequence of events in
story
Understands sequence of human
growth

Association Skills

Relates facial expression with affective state
Relates affective state with its cause
Relates picture with event in story sequence

RESPONSE SKILLS

Verbal Skills

Answers questions concerning story content and sequence of events Interprets pictures (picture-reading

2. Basic Activity

Read or picture-read the book <u>Bunny's</u>
<u>New Clothes</u>. Make sure all the children have an opportunity to look at
the pictures as you move through the
story. When Oliver starts to cry, ask
the children why he is so sad and how
they would feel. Some children may
find this amusing, but others will
feel sad. Both reactions are acceptable. As you move on, ask the children questions to build anticipation
for the events to follow.

Examples: Ask what they think Oliver's mother will do about the tight clothes.

Evaluation

Because this is a simple story, it should be fairly easy for the children to recall the events in sequence. Ask questions, beginning with the bunny's name and what he did when he woke up one morning, to help the children recall the story. Show the pictures in the book as clues to the events which took place. At the close of the review, emphasize the fact that Oliver was growing (getting bigger). Ask the children if anyone is wearing shoes or a dress, shirt, or pants which are beginning to feel tight. Talk about how they are all growing bigger.

Extension Activity

Read other stories about growth and change such as <u>Patrick Will Grow</u> or When I Grow Up.

- When we are very young, we are called babies or infants.
- 2. As we grow older, we are called children.
- 3. When we are full grown, we are called adults.
- 4. When we become very old, we are called elderly.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on height charts and pictures
Discriminates likenesses and differences in physical characteristics of people in pictures
Scans pictures from left to right

Auditory Skills

Listens to discussion, new labels, questions, and directions

ABSTRACTING SKILLS

Conceptual Skills

Recognizes size concepts -- short,
tall; shorter, taller; big,
little; large, small; bigger,
larger, smaller
Understands age concepts and
growth cycle -- infant, child,
teenager, adult, elderly person
Understands adult activities and
occupations

Association Skills

Relates age of a person with certain characteristics
Relates each stage in the growth cycle with its label

3. Basic Activity

Plan an activity to review and expand the concepts of height, growth, and age which were introduced in activities F-2 and F-3. Direct the children's attention to their height charts on the classroom wall. Ask the children if they will always be the same height as the charts now show. How will they change in height over the year? Ask different children to find their charts and point to where they think their height lines might be when they go to first grade. Accept any response which indicates the child understands that the line will move up because he will grow taller.

Then ask the children how they will look when they are "all grown up." What types of things can adults do? Ask each child to contribute something he would like to do or "be" when he becomes a grown-up or adult.

Discuss changes which occur in adults as they grow older. As they grow older, we say they become "elderly." Ask different children to describe a grandparent or great-grandparent.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

RESPONSE SKILLS

Verbal Skills

Predicts his own growth
Suggests adult activities
Suggests what he would like to do
or be when he becomes an adult
Describes people in pictures
Identifies the age of a person by
certain physical characteristics

Motor Skills

Points to a place on the height chart which is above the present height mark
Orders pictures of people by increasing age from left to right

3. (cont.)

Assessment Activity

Collect approximately six magazine pictures of males and females at different stages in the growth cycle -- infant, child, teenager, adult, elderly person -- and mount each one on tagboard. Show the children the pictures in no particular order. Ask them to describe each person and identify his general age group. Then ask the children to order the pictures from the youngest to the oldest. As the children establish the sequence, arrange the pictures in front of the group (from youngest to oldest) moving from left to right.

UNIT UNDERSTANDING: I. We are all living things.

- Living things grow, reproduce, and need food, water, and air in order to live and grow.
- 2. Things which are not alive are called non-living things.
- 3. Clothes, furniture, and toys are some non-living things because they do not grow and reproduce.

BASIC SKILLS TO BE DEVELOPED

INSTRUCTIONAL ACTIVITIES

SENSORY SKILLS

Visual Skills

Focuses attention on teacher, real objects, and pictures of objects

Auditory Skills

Listens to discussion, questions, and directions

ABSTRACTING SKILLS

Conceptual Skills

Knows real and pictured objects
Understands concepts of growth
and change
Understands concepts of living
and non-living

Association Skills

Relates growth and change with living things
Relates each real and pictured object with its label

Classification Skills

Comprehends classes of living and non-living things

RESPONSE SKILLS

<u>Verbal</u> <u>Skills</u>

living

Labels objects and pictures of objects
Identifies object as to whether it grows and changes
Identifies object according to whether it is living or non-living
Uses negative statements -- not

1. Basic Activity

Explain to the children the fact that all people -- babies, children, mothers fathers, grandparents, friends -- are called living things. Living things are all the things around them which grow and change. Move around the room pointing to different objects, and ask the children if each is or is not a living thing. Include yourself and several children as some of the objects. With each object, ask if the object grows and changes. Use a plant in the room or one which you bring to school as one object you discuss. Compare a child to the plant. Even though the plant does not move around like people, it does grow and change. Plants, like people, are living things.

Assessment Activity

In a later activity, play a classification game to evaluate whether the children have grasped the concepts of "living" and "non-living." In a bag or box, place an assortment of pictures of people, clothing, toys, furniture, plants, common animals (cat, dog). Give each child a turn to select a picture from the bag, label it, and tell whether it is or is not a living thing. Ask each child to explain his answer in terms of whether or not the object grows and changes.

UNIT UNDERSTANDING: I. We are all living things.

BASIC SKILLS TO BE DEVELOPED INSTRUCTIONAL ACTIVITIES

1. (cont.)

· Extension Activity

If possible, take an observation walk around the school to look for living and non-living things. Try to find some plants, people, animals, stones, toys, etc. to point out to the children. Encourage the children to label each object and identify it as a living or non-living thing.

SONG: "Where Is Mary?"

Activity A-1

Source of Tune

"Are You Sleeping"

Music Round the Clock (p. 11)

Krone, M. T. (Ed.)

Follett Publishing Co., 1963

Words for Song

- T: Where is Mary?
- T: Where is Mary?
- T: There she is. or C: Here I am.
- T: There she is. or C: Here I am.
- T: How are you this morning?
- C: Very well and thank you.
- T: She is sitting down.
- T: She is sitting down.

Suggested Procedure for Using Song

Repeat the verse until you have sung to every child in the room. If the child hesitates to identify himself by singing "Here I am," the teacher and other children can sing "There he is." (Other words can be substituted for the last two lines.)

ACTION SONG: "Head, Shoulders, Knees, and Toes"

Activity B-4

Source of Tune

"The Mulberry Bush"

Fireside Book of Children's Songs (p. 172)

Winn, M., & Miller, A. (Eds.)

Simon and Schuster, 1966

Words for Song

My head, my shoulders, my knees, my toes, My head, my shoulders, my knees, my toes, My head, my shoulders, my knees, my toes, Let's clap hands together.

My toes, my knees, my shoulders, my head, My toes, my knees, my shoulders, my head, My toes, my knees, my shoulders, my head, Let's sit down together.

Suggested Procedure for Using Song

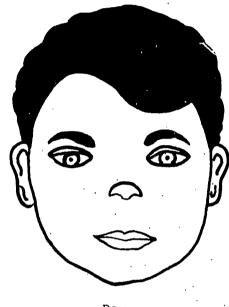

Sing the song while standing. As you name the body parts, touch them using both hands. Other actions than "clap hands" and "sit down" can be substituted for the last line of each verse.

Activity F-7

Source of Song

DARCEE teachers

Song

SONG: "It's Clean-Up Time

Activity G-3

Source of Song

Mrs. June Miller
DARCEE Lead Teacher

Song

Additional Verses

It's clean-up time, it's clean-up time,
It's almost time to eat;
It's clean-up time, it's clean-up time,
Let's make things nice and neat.

It's clean-up time, it's clean-up time,
It's almost time for play;
It's clean-up time, it's clean-up time,
Let's put our work away.
